College Principal's Message

Education is the third eye of a human being.

It makes man in the complete sense and gives him a thorough knowledge of the

quality of life. In this context, the expansion of education in backward areas becomes even more important. For this, the Government Kirti College, the underprivileged is such an education institute which gives special attention to girls' education. This institution is the only government organization of Patran, Moonak, Khanauri, Dirba, Tehsil, which is making a significant contribution in the field of education by creating the light of education among laborers, farmers and other educationally backward castes in the area...
